Contiguous Read Length Report

The Contiguous Read Length (CRL) is the longest uninterrupted stretch of bases with quality higher than a specified limit.   In the evaluation of the quality of each base, not only the quality value of that base is used, but also those of adjacent bases within a specified window size.

Contiguous Read Length : N = 24, Range = 0 - 650, Median = 0, Mean = 81, StandardDev = 149
